"GREEN SHEET"

Meeting: April 11-12, 2008
Agenda Item 12: Amend WAC 232-28-337 Deer and elk area descriptions – **Rule Action**
Prepared By: Jerry Nelson
Presented By: Jerry Nelson, Deer and Elk Section Manager, Wildlife Program

Background:

For the last three winters, late archery deer and elk seasons in Game Management Unit (GMU) 368 have coincided with elk coming down to feed stations in that GMU. It is the Department's intent to keep hunters away from active feeding areas whenever possible. In addition, elk damage near Elk Area 6012 Tri Valley has expanded in the scope.

Policy Issue(s) you are bringing to the Commission for consideration:

- Create Elk Area 3681 and Deer Area 3682 in GMU 368 to direct late season archery hunters away from feed stations. This maintains opportunity without impacting feeding operations.
 - Expand Elk Area 6012 to encompass new elk damage activity.
-

Public involvement process used and what you learned:

These proposed recommendations were mailed to approximately 450 organizations and individuals in January for their review and consideration. These organizations and individuals were also informed of the opportunity to provide public testimony at the March 7-8, 2008 Commission meeting in Olympia.

Action requested (identify the specific Commission decisions you are seeking):

Amend WAC 232-28-337 Deer and elk area descriptions, as presented.

Draft motion language:

I move to amend WAC 232-28-337 as proposed.

Justification for Commission action:

Provides recreational opportunity for the citizens of Washington, helps reduce wildlife damage to agricultural crops, and protects deer and elk from overharvest.

AMENDATORY SECTION (Amending Order 07-292, filed 12/13/07, effective 1/13/08)

WAC 232-28-337 Deer and elk area descriptions.

SUPPLEMENTAL RECOMMENDED ADJUSTMENTS

The following adjustments are proposed since the Code Reviser (CR 102) filing and are already included in your notebooks.

Page 15

Under Elk Area 6012 Tri Valley, add the following change:

Elk Area No. 6012 Tri Valley (Grays Harbor and Mason counties): Those portions of GMUs 648 (Wynoochee) and 651 (Satsop) within one mile of Brady-Matlock Road from State Highway 12 north to the junction with Schaefer State Park Road (east Satsop Road) and all lands within one mile of Wynoochee Valley Road from State Highway 12 north to the junction with Cougar Smith Road, and all lands within one mile of Wishkah Valley Road from north Aberdeen city limit to (~~the junction with Wishkah-East Hoquiam Road~~) mile post 16 and all lands within 2 miles north of SR 12 between the Satsop River and Schouweiler and Hurd roads and then a line north from the end of Hurd Road to a point 2 miles north of SR 12.

This change slightly expands the elk area to address new damage concerns.

SUMMARY OF WRITTEN PUBLIC INPUT

WAC 232-28-337 Deer and elk area descriptions

| COMMENTS | AGENCY RESPONSE |
|--|--|
| <p>The 3911 north boundary should be adjusted to a previous lower power line.</p> | <p>The current boundary was located at the upper powerline partially in response to requests from landowners in the area.</p> <p>Also, we have occasions where elk will find refuge and bed down 2-3 miles from croplands, but still raid those crops during the evening, crossing the AHE boundary just after dark. The current boundary reduces the likelihood of elk finding safe refuge in close proximity to croplands.</p> |
| <p>We support the recommended changes and urge the Region 3 staff to consider eliminating that portion of 3911 (AHE) east of the Beacon Ridge Road. The majority of the area is private land and Ginko State Park. The private land is all posted and there has never been an elk complaint in this area.</p> | <p>The Department is still reviewing this possibility. If the Department determines this is necessary, we will present amendments to the Commission during the normal time frame that we address deer and elk area boundaries, which is a briefing in November with potential adoption in December.</p> |
| <p>Enlarge 3911 to include public land – Reecer Creek Wenatchee National Forest Area as before. 3911 is almost entirely on private ground now. Some AHE folks are paying farmers for access. This is not fair to most other AHE hunters. Private citizens are also feeding elk on their property, which makes it more difficult to harvest an elk. We need more public area in 3911.</p> | <p>The damage problem that the 3911 hunt is designed to address is mainly a private lands issue. We are trying to focus the elk harvest on those animals causing problems on private land, not those elk living on public land.</p> |

ATTACHMENT A

WAC 232-12-004 Classification of wild birds

Purpose of the proposal and its anticipated effects, including any changes in existing rules:

The amendment adds Eurasian collared dove to the list of predatory birds in Washington.

Reasons supporting proposal:

The Eurasian collared dove is a non-native species that has recently expanded its range into Washington. The effects of this species are not known, but there is some evidence that it may compete with our native mourning doves. The proposed amendment would classify the species as a predatory bird, which would allow it to be taken year-round with a hunting license as provided under WAC 232-12-005.

WAC 232-12-045 Hunting equipment restrictions

Purpose of the proposal and its anticipated effects, including any changes in existing rules:

This proposal will restrict the use of telemetry equipment for hunting deer, elk, bear, moose, mountain goat, and bighorn sheep that have radio transmitters attached to them.

Reasons supporting proposal:

It is too easy for hunters to find and harvest wildlife with transmitters attached to them and hunting in this manner may bias the results of research projects.

WAC 232-28-273 2006-2008 Moose, bighorn sheep, and mountain goat seasons and permit quotas

Purpose of the proposal and its anticipated effects, including any changes in existing rules:

Rule amends 2008 seasons and permit quotas for moose, bighorn sheep, and mountain goats. The purpose of the rule is to maximize recreational hunting opportunities for these species while meeting the population and recreational objectives for each herd as indicated in the Game Management Plan. The rule changes include minor statewide permit level changes for moose (+14 permits) and bighorn sheep (+2 permits), as well as hunt boundary changes for mountain goat. The anticipated effect is stable to increase populations of these hunting species.

Reasons supporting proposal:

Recommended adjustments in permit quotas are based on meeting population objectives for each species as indicated in the Game Management Plan.

WAC 232-28-295 Landowner hunting permits

Purpose of the proposal and its anticipated effects, including any changes in existing rules:

The proposal identifies permit levels and season dates for Landowner Hunting Permit (LHP) program participants for the 2008 hunting seasons. There are calendar date modifications for some permits, but no changes in permit levels are being proposed. If adopted, the proposal will allocate 70 deer permits and 186 elk permits among 5 LHP cooperators. Sixty percent of the permits will be for antlerless animals while 24% will be for antlered animals and 16% for any elk.

Reasons supporting proposal:

The proposed permits are consistent with the Commission's private lands hunter access program policy (C-6002). The permits will result in general public hunter access on private property and will help mitigate deer and elk foraging on private agricultural lands.

WAC 232-28-337 Deer and elk area descriptions

Purpose of the proposal and its anticipated effects, including any changes in existing rules:

The proposed change removes elk feeding areas from GMU 368.

Reasons supporting proposal:

This proposal allows the continuation of December hunting seasons without impacting feeding activities or creating unethical hunting situations.

WAC 232-28-342 2006-07, 2007-08, 2008-09 Small game seasons

Purpose of the proposal and its anticipated effects, including any changes in existing rules:

Since 2003, the Department has proposed liberalized fall, either sex turkey hunting seasons in northeastern and southeastern Washington, to provide expanded hunting opportunity and to address undesired turkey population increases. This proposal would change fall turkey hunting opportunities by increasing fall turkey permit levels in some southeastern Washington Game Management Units (GMUs), while moving some northeastern GMUs from "early fall permit only" to "early fall general season" designations.

The amendment also extends the mourning dove season from 15 to 30 days in September, modifies the mourning dove falconry season to be consistent with federal rules, and makes the September goose season in Grays Harbor consistent with the remainder of Goose Management Area 3.

Reasons supporting proposal:

The proposed changes provide: 1) greater turkey population control in areas experiencing unwanted population growth or, 2) increased turkey hunter opportunity in areas where expanding populations can support increased fall harvest.

The 2003-09 WDFW Game Management Plan prescribes a restrictive dove season until a significant increase is observed in the 10-year Washington breeding population index. In 2007, a significant increase was observed in this index, and the department is recommending an increase in the 2008 dove season length from 15 to 30 days, with season dates September 1-30. Grays Harbor County was included in Goose Management Area 3 in 2006, and the 2008 September goose season in Grays Harbor County is proposed for change to be consistent with season dates in the remainder of Goose Management Area 3.

WAC 232-28-351 2006-2008 Deer general seasons and definitions

Purpose of the proposal and its anticipated effects, including any changes in existing rules:

This rule amends the 2008 seasons for deer. The rule clarifies the antler restriction in GMU 554; focuses late season opportunity in a portion of GMU 162; and retains a late deer season in the main part of GMU 368.

Reasons supporting proposal:

Recommended adjustments clarify restrictions, and helps focus harvest where desired. The change from GMU 368 to Deer Area 3682 helps retain the late hunt without impacting elk feeding operations.

WAC 232-28-352 2006-2008 Elk general seasons and definitions

Purpose of the proposal and its anticipated effects, including any changes in existing rules:

This rule amends the 2008 seasons for elk. The rule modifies the season dates for the Elk Area 3911 damage hunt to provide better incentives for harvesting elk early in the season. Hunts that end in January are amended to end on January 20th to allow time for hunters to report prior to the January 31 reporting deadline. This proposal also establishes a hunt in Elk Area 3681, which avoids conflict with elk feeding stations and ethical issues while retaining the late elk season in the main part of GMU 368.

Reasons supporting proposal:

Recommended adjustments clarify restrictions, and helps focus harvest where desired. The change from GMU 368 to Elk Area 3681 helps retain the late hunt without impacting elk feeding operations.
