Mr. Michael Grayum  
Executive Director  
Northwest Indian Fisheries Commission

Olympia, Washington 98516

Dear Dr. Koenings and Mr. Grayum:

Enclosed is the finalized summary fisheries document of the parties for 2007 that represents the results of negotiations between the Washington Department of Fish and Wildlife and the Northwest treaty tribes during the North of Falcon and Pacific Fisheries Management Council (PFMC) pre-season planning forums. This document contains summaries of agreed fishing arrangements for treaty and non-treaty salmon fisheries in the ocean north of Cape Falcon and in Puget Sound. Further details, including stock-by-stock management objectives, may be found in the Puget Sound Chinook Harvest Management Plan approved by NMFS under the ESA, in the respective parties' regulation summaries, in Status Report documents (as required by the Puget Sound Salmon Management Plan), and other state-tribal understandings.

The fishing arrangements contained in this document are based on pre-season expectations of stock abundance and, in some instances, may be modified on the basis of information obtained in-season and by agreement between the parties. If any changes to the assumptions used to develop these fishing arrangements should occur that would significantly affect the achievement of the parties' agreed management objectives, the parties agree to meet to consider the need to make the necessary changes to these fisheries. The agreed upon fisheries document includes treaty and non-treaty commercial and non-treaty recreational fisheries. Individual treaty tribes may conduct additional ceremonial and subsistence fisheries not detailed in this agreement, consistent with provisions of the Puget Sound Salmon Management Plan.

We note that final plans for some fisheries in the Elliott Bay and Green/Duwamish areas remain unresolved at this time and are noted by bolded language within brackets. State and tribal fishery managers will continue to work on resolution of these issues.

Final FRAM model run summary tables appended to the agreed upon fisheries document provide our assessment of impacts on key natural coho and chinook salmon populations.

Detailed descriptions of the management intent and descriptions of monitoring, sampling, and enforcement activities for conducting chinook mark selective sport fisheries during the 2007-2008 management year in Areas 5 – 11 and 13 are an integral part of this fisheries agreement. These mark selective fishery documents are still in preparation, but will be considered a part of the agreement package when completed.

Sincerely,

**Part I Treaty/Non-Treaty Ocean Fisheries (FRAM #3907 & #0714)**

Treaty Troll Quota	35,000 Chinook; 38,000 coho
Nontreaty TAC	32,500 Chinook; 140,000 coho
NT Troll TAC	16,250 Chinook; selective fishery impacts associated with a landed catch of 22,400 marked hatchery coho
Recreational TAC	16,250 Chinook and selective fishery impacts associated with a landed catch of 117,600 marked hatchery coho.

**1.1 Treaty Troll: Areas 2, 3, 4 & 4B**

5/1-6/30	Chinook directed fishery with sub quota of 21,500 Chinook. Chinook left uncaught during this period may be taken in the July-September time period at a ratio of 0.3508 to 1, which is designed to keep impacts neutral to Coweeman Chinook.
7/1-9/15	All salmon species with sub quota of 13,500 Chinook or quota of 38,000 coho, whichever comes first. The Chinook sub-quota may be increased by the adjusted uncaught amount described above for the May-June time period. Chum release 8/1-9/30.

**1.2 Non-Treaty Troll: U.S./Canada border to Cape Falcon**

5/1-6/30	All salmon except coho with 10,850 Chinook quota; open May 1-2 and May 5-8 with a landing and possession limit of 60 Chinook per vessel north of Leadbetter Point and 40 chinook per vessel south of Leadbetter Point for each open period. Beginning May 12, open Saturday-Tuesday with a landing and possession limit of 60 Chinook per vessel north of Leadbetter Point and 30 chinook per vessel south of Leadbetter Point for the each subsequent four-day open period. Mandatory Yelloweye Rockfish Conservation Area, Columbia and Cape Flattery Control Zones closed. Trip limits, gear restrictions, and guidelines may be implemented or adjusted in-season. Vessels must land their fish within 24 hours of any closure of this fishery; under state law, vessels must report their catch on a state fish receiving ticket. Vessels fishing north of Leadbetter Point must land and deliver their fish within the area and north of Leadbetter Point. Vessels fishing south of Leadbetter Point must land and deliver their fish within the area and south of Leadbetter Point, except that Oregon permitted vessels may also land their fish in Garibaldi.. State regulations require that all fishers landing fish into Oregon from any fishery between Leadbetter Point, WA and Cape Falcon, OR must notify Oregon Department of Fish and Wildlife within one hour of delivery or prior to transport away from the port.
----------	--

July 1 thru earliest of Sept. 16 or pre-season Chinook subquota of 5,400 or coho quota of 22,400.

If coho quota remains after Chinook quota is projected to be reached, the area south of Leadbetter Point will remain open to all salmon except Chinook, provided adequate Chinook quota remains to account for non-retention mortality. . Open Saturday through Tuesday. Landing and possession limit of 40 Chinook per vessel per open period north of Leadbetter Point and 20 Chinook south of Leadbetter Point. All salmon except no chum retention north of Cape Alava, Washington in August and September (all retained coho must have a healed adipose fin clip, except an inseason conference call may occur to consider allowing retention of all legal sized coho, in the area between Leadbetter Point and Cape Falcon, no earlier than September 1). Mandatory Yelloweye Rockfish Conservation Area, Cape Flattery and Columbia Control Zones closed. Trip limits, gear restrictions, and guidelines may be implemented or adjusted in-season. Vessels must land their fish within 24 hours of any closure of this fishery. Under state law, vessels must report their catch on a state fish receiving ticket. Vessels fishing north of Leadbetter Point must land and deliver their fish within the area and north of Leadbetter Point. Vessels fishing south of Leadbetter Point must land and deliver their fish within the area and south of Leadbetter Point, except that Oregon permitted vessels may also land their fish in Garibaldi. State regulations require that all fishers landing fish into Oregon from any fishery between Leadbetter Point, WA and Cape Falcon, OR must notify Oregon Department of Fish and Wildlife within one hour of delivery or prior to transport away from the port.

### 1.3 Non-Treaty Recreational

#### Area 1: Leadbetter Point to Cape Falcon (Oregon)

7/1-9/30 (58,800 marked coho sub quota)	Open seven days per week; 2 fish per day, only one of which may be a Chinook; retained coho must have a healed adipose fin clip; Chinook minimum size limit 24 inches and coho minimum size 16"; Chinook guideline: 4,300; closed in Columbia Control Zone. Inseason management may be used to sustain season length and keep harvest within the overall Chinook recreational TAC for north of Cape Falcon
<b>Buoy 10</b>	
8/1-9/30	Open 7 days/week; 2 fish per day, only one of which may be a Chinook; Chinook retention allowed only August 22 through September 3. Chinook minimum size 24 inches and coho minimum size 16 inches; retained coho must have a healed adipose fin clip; release sockeye, chum, and unmarked coho. Barbed hooks allowed.
1/1/08-3/31/08	Open 7 days/week; 6 fish per day, 2 adults (minimum size 12 inches); retained Chinook must have a healed adipose fin clip; release sockeye, chum, unmarked coho and unmarked Chinook. Barbed hooks allowed.

North Jetty	Open 7 days per week when Area 1 or Buoy 10 area is open. When Buoy 10 area and Area 1 are open concurrently, the daily limit and minimum size restrictions follow the most liberal regulations of those areas. Barbed hooks allowed.
<b>Area 2: Queets River to Leadbetter Point</b>	
7/1-9/16 (43,510 marked coho sub quota)	Open Sun-Thur; 2 fish per day, only one of which may be a Chinook; retained coho must have a healed adipose fin clip; Chinook minimum size limit 24 inches and coho minimum size 16 inches; Chinook guideline: 9,400. In-season management may be used to sustain season length and keep harvest within the overall Chinook recreational TAC for north of Cape Falcon. Grays Harbor control zone closed beginning August 1.
<b>Area 2-1 (east of a line from Leadbetter Point to Cape Shoalwater): Willapa Bay</b>	
7/1-7/31	Open concurrent with Area 2, when Area 2 is open for salmon. Area 2 rules apply.
8/1-8/15	6 fish limit, 2 adults, 12" min size limit; barbed hooks allowed
8/16-1/31/08	6 fish limit, 3 adults; no more than 2 adult Chinook; 12" min size limit; barbed hooks allowed.
<b>Area 2-2 (east of line between tips of exposed jetties): Grays Harbor</b>	
West of Buoy 13 line 7/1- 7/31	Open concurrent with Area 2, when Area 2 is open for salmon. Area 2 rules apply.
East of Buoy 13 line 7/1-9/30	Closed for salmon through 9/30.
East of Buoy 13 line 10/1-10/31	2 fish per day, only one Chinook. Minimum size 12 inches. Single-point barbless hooks required.
East of Buoy 13 line 11/1 - 11/30	2 fish limit, min. size 12", release Chinook. All salmon required to be released may not be totally removed from the water, except anglers fishing from boats 30' or longer as listed on either their State or Coast Guard regulation are exempt. Single-point barbless hooks required.
<b>Westport Boat Basin and Ocean Shores Boat Basin</b>	
8/16-1/31/08	6 fish limit, 4 adults; 12" min size limit; barbed hooks allowed; night closure and non-buoyant lure restriction.
<b>Area 3: Cape Alava to Queets River</b>	
7/3-9/15 (2,960 coho sub quota)	Open Tues-Sat; 2 fish per day, only one of which may be a Chinook plus one additional pink salmon 8/1 - 9/15; retained coho must have a healed adipose fin clip; Chinook minimum size limit 24 inches, coho minimum size 16 inches; Chinook guideline: 725. Inseason management may be used to sustain season length and keep harvest within the overall Chinook recreational TAC for north of Cape Falcon

LaPush Late Season Area 9/22-10/7	(100 coho sub quota; 100 Chinook sub quota) Fishery restricted to the area north of 47°50'00" N latitude and south of 48°00'00" N latitude. Open 7 days/wk. Other regulations as described above.
-----------------------------------	---

**Area 4: US/Canada border to Cape Alava and east to Sekiu River**

7/3-9/15 (12,230 marked coho sub quota)	Open Tuesday through Saturday; 2 fish per day, only one of which may be a Chinook plus one additional pink salmon beginning August 1. Chum non-retention during August and September. Retained coho must have a healed adipose fin clip; Chinook minimum size limit 24 inches and coho minimum size 16 inches; Chinook guideline: 1,725; Chinook non-retention east of Bonilla-Tatoosh line beginning August 1. In-season management may be used to sustain season length and keep harvest within the overall Chinook recreational TAC for north of Cape Falcon

Chinook	All	Closed
Sockeye	Trty	<p>Schedule to be determined. The Co-managers have identified the following management actions to track and control by-catch. Estimated by-catches are best estimates and are not quotas. The priority for this fishery is to harvest the full treaty share of sockeye and pink salmon, while managing the fishery so as to not greatly exceed the projected incidental harvest of Chinook salmon. All Chinook by-catch in this fishery will be promptly reported by each Tribe to the U.S. Section of the Fraser Panel, including take home and ceremonial and subsistence (C&amp;S). Prior to achieving a by-catch of 4,200 Chinook there will be no restrictions on the retention or sale of Chinook salmon. If, during the season, the Fraser Panel schedules a fishery that is projected to result in a total Chinook by-catch exceeding 4,200 fish, the Tribes will, effective with that scheduled fishery, prohibit any commercial sales of Chinook salmon, and any Chinook salmon landed must be donated to the fisher's respective Tribe. If, during the season, the Fraser Panel schedules a fishery that is projected to result in a total Chinook by-catch exceeding 6,300 fish, the Tribes will, effective with that scheduled fishery, prohibit all retention of Chinook salmon by all fishers; unless a projection for the remainder of the 2007 sockeye and pink fishery will not result in a total by-catch of more than 6,700 Chinook. July and August – C&amp;S fishery. Further policy discussion may occur among the affected parties prior to the season.</p>

	Ntrty	The Co-managers have identified the following management actions to track and control by-catch. Estimated by-catches are best estimates and are not quotas. Schedule to be determined. Modeled for Wks 33 (wb 8/12) – 37 (wb 9/9). All vessel operators must complete best fishing practices certification prior to fishing. Purse seine brailing and use of recovery box required with Chinook, coho, and chum NR from 8/1 – 9/30 and reef net Chinook, coho, and chum NR from 8/1 – 9/30. Estimates of by-catch will be shared at least weekly in the U.S. Section of the Fraser River Panel. Sockeye/Pink fishery will be managed to ensure that the non-treaty impact does not exceed 2,317 total Chinook (120% of pre-season estimate). WDFW intends to develop a DNA sampling and analysis program to be implemented during this fishery for the purpose of estimating stock specific estimates of Chinook by-catch.
Pink	Trty	Purse seine and gill net: schedule dependent upon Fraser Panel. (See Chinook by-catch in-season actions description in sockeye, above).

## 5. Nooksack/Samish Terminal Region

### Bellingham Bay (Areas 7B, 7C, 7D; 7A On-Reservation) Net

Due to difficulties encountered in meeting the Chinook egg take goal at the Samish hatchery in recent years, managers agree to meet prior to August 1 to discuss any adjustments to schedules necessary to ensure that the number reaching the hatchery meets or exceeds the goal. Managers will also discuss options for in-season management.

\* Area 4 Sport numbers include 4B add-on, if any, and a number of fish caught on Canadian licenses in areas 4 and 4B. FRAM assumes that there are no changes in the relative exploitation rates of model stocks estimated from the base period (1986-91). The possibility exists that with the changes to the structure of a fishery the relative exploitation rates of the stock may change as well, though an analysis of the data has yet to be done.

\* Model-predicted Escapement for Washington Coastal stock aggregates represents run entering the rivers or

"Ocean Escapement," and does not represent all exploitation for coastal stocks!

\*\* Puget Sound Area 6B/9 Net is apportioned using agreed Run Reconstruction apportionment rather than FRAM CWT-based projections of stock impacts

notes:

11 From TAMM Tables 2; excludes freshwater sport

12 Puget Sound Stocks From TAMM (includes freshwater sport); Coastal stocks escapement = "run entering river" from FRAM

13 "Total Fishery-related Mortality Plus Escapement" (does not include natural mortality) or

For Coastal Stocks: Pre-River Mortality Plus Run Entering River (does not include natural escapement)

14 This is NOT AEQ Exploitation Rate because natural mortality is not included! See Table 2 for all-fishery ERs for coastal stocks.

15 Sum of exploitation rates for Southern U.S. only: SoF, Ocean 1-4, Col. R., coastal harbors, Puget Sound
