Mr. Michael Grayum  
Executive Director  
Northwest Indian Fisheries Commission  
6730 Martin Way East  
Olympia, Washington 98516

Dear Dr. Koenings and Mr. Grayum:

Enclosed is the finalized summary fisheries document of the parties for 2008 that represents the results of negotiations between the Washington Department of Fish and Wildlife and the Northwest treaty tribes during the North of Falcon and Pacific Fisheries Management Council (PFMC) pre-season planning forums. This document contains summaries of agreed fishing arrangements for treaty and non-treaty salmon fisheries in the ocean north of Cape Falcon and in Puget Sound. Further details, including stock-by-stock management objectives, may be found in the Puget Sound Chinook Harvest Management Plan approved by National Marine Fisheries Service (NMFS) under the Endangered Species Act (ESA), in the respective parties' regulation summaries, in Status Report documents (as required by the Puget Sound Salmon Management Plan), and other state/tribal understandings.

The fishing arrangements contained in this document are based on pre-season expectations of stock abundance and, in some instances, may be modified on the basis of information obtained in-season and by agreement between the parties. If any changes to the assumptions used to develop these fishing arrangements should occur that would significantly affect the achievement of the parties' agreed management objectives, the parties agree to meet to consider the need to make the necessary changes to these fisheries. The agreed upon fisheries document includes treaty and non-treaty commercial and non-treaty recreational fisheries. Individual treaty tribes may conduct additional ceremonial and subsistence fisheries not detailed in this agreement, consistent with provisions of the Puget Sound Salmon Management Plan.

Final FRAM model run summary tables appended to the agreed upon fisheries document provide our assessment of impacts on key natural coho and Chinook salmon populations.

##### Areas 6, 7, & 7A Net

Chinook	All	Closed
Sockeye	Trty	Schedule to be determined. The Co-managers have identified the following management actions to track and control by-catch of Chinook. Estimated by-catches are best estimates and are not quotas. The priority for this fishery is to harvest the full treaty share of sockeye salmon, while managing the fishery so as to not greatly exceed the projected incidental harvest of Chinook salmon. All Chinook by-catch in this fishery will be promptly reported by each Tribe to the NWIFC softdata system and reported to the U.S. Section of the Fraser Panel at least weekly, including take home and ceremonial and subsistence (C&S). Prior to achieving a by-catch of 4,200 Chinook there will be no restrictions on the retention or sale of Chinook salmon. If, during the season, the Fraser Panel schedules a fishery that is projected to result in a total Chinook by-catch exceeding 4,200 fish, the Tribes will, effective with that scheduled fishery, prohibit any commercial sales of Chinook salmon, and any Chinook salmon landed must be delivered to the fisher’s respective Tribe. If, during the season, the Fraser Panel schedules a fishery that is projected to result in a total Chinook by-catch exceeding 6,300 fish, the Tribes will, effective with that scheduled fishery, prohibit all retention of Chinook salmon by all fishers; unless a projection for the remainder of the 2008 sockeye fishery will not result in a total by-catch of more than 6,700 Chinook. July and August – C&S fishery. Further policy discussion may occur among the affected parties prior to the season.

	Ntrty	Schedule to be determined. Modeled for Wks 32 (wb 8/3) – 34 (wb 8/17), 1,2,1. The Co-managers have identified the following management actions to track and control by-catch. Modeled by-catches are best estimates and are not quotas. All vessel operators must complete best fishing practices certification prior to fishing. Purse seine brailing and use of recovery box required with Chinook, coho, and chum NR from 8/1 – 9/30, and reef net coho, chum, and unmarked Chinook NR from 8/1 – 9/30. Reef net fishers may retain marked Chinook, with a cap of 300 for all gears for the season. Estimates of by-catch will be shared at least weekly in the U.S. Section of the Fraser River Panel. Should the season develop as anticipated, with very limited sockeye opportunity, purse seine and gillnet fisheries will be managed to ensure that the non-treaty impact does not exceed 1,212 total Chinook (120% of pre-season estimate). Should sockeye returns allow more opportunity than expected pre-season, WDFW will consider appropriate additional steps to limit Chinook by-catch, while attempting to harvest the non-treaty share of sockeye. WDFW intends to continue a DNA sampling and analysis program to be implemented during this fishery for the purpose of estimating stock specific estimates of Chinook by-catch.
Coho	Trty	Closed
	Ntrty	Reef net: 7 days/wk beginning at end of Fraser Mgmt through chum mgmt wk 46 (wb 11/9); Chinook NR after 9/30; unmarked-coho release through 9/30, then coho non-selective. Chum retention prohibited until after 9/30. All vessel operators must complete best fishing practices certification prior to fishing.
Chum	Trty	Starting 10/10 through 11/15; fishing pattern dependent upon TAC and any relevant in-season updates.
	Ntrty	Wks 41 (wb 10/5) – Wk 46 (wb 11/9); Purse seine brailing required, Chinook and coho NR; GN Chinook and coho NR, live box, and limited soak time restrictions wk 41 and 42; fishing pattern: 1,3,5,5,5,5; dependent upon ISU and quotas. Reef nets through wk 46 (wb 11/9), 7 days per week. All vessel operators must complete best fishing practices certification prior to fishing.
Subsistence	Trty	2/1-4/15 subsistence fishery
