

Willapa Bay Salmon Management Policy (C-3622)

Comprehensive Review Progress Update

Washington Dept of Fish & Wildlife Commission – Fish

Committee Meeting

July 30, 2020

Policy C-3622 Comprehensive Review Process Timeline

- July 2020
 - Review document completed
- August 2020
 - Provide draft comprehensive review document to Willapa Bay Salmon Advisory Group (WBSAG) members and the public
 - Posting on agency website
 - Public meeting scheduled for August 18th via webinar
 - Receive feedback on draft document
- September 10-12, 2020, FWC meeting
 - Overview of review document
 - Report on public and WBSAG feedback
 - Seek approval of draft review document
- October 22-24, 2020, FWC meeting
 - First cut of a markup version of policy
 - Seek approval to release for public comment
 - Post on Agency website
- November 20, 2020, FWC meeting
 - Report on public and WBSAG feedback
 - Draft policy revisions (if necessary)
- December 3-5, 2020, FWC meeting
 - Briefing and public comment on draft policy
- December 18, 2020, FWC meeting
 - Commission decision on Willapa Bay Salmon Management Policy C-3622

Comprehensive Evaluation of the Willapa Bay Salmon Management Policy C-3622, 2015-2018

By: Washington Department Fish and Wildlife, Region 6, Fisheries Staff

Table of Contents:

I. List of Tables and Figures

1.0 Executive Summary

- 1.1 General Fisheries Management
- 1.2 Fall Chinook Salmon Management
- 1.3 Coho Management
- 1.4 Chum Management
- 1.5 Adaptive Management
- 1.6 Economic Analysis
- 1.7 Conclusions

2.0 Purpose and Approach

- 2.1 Purpose
- 2.2 Background
- 2.3 Task
- 2.4 Approach
- 2.5 Policy Implementation Report Card

3.0 Policy C-3622 with Evaluation Emphasis Questions

4.0 General Fisheries Management

- 4.1 Conservation of Wild Salmon
 - 4.1.1 Question 1- Conservation and fishery impact rates
 - 4.1.2 Question 2- Species restoration
 - 4.1.3 Question 3- Current status of coastal Chinook salmon ESU
- 4.2 Monitoring, Sampling and Enforcement Programs
- 4.3 Improved Fishery Management and Technical Tools
 - 4.3.1 Question 14- Technical improvements
- 4.4 Mark-Selective Fisheries (MSF)
 - 4.4.1 Question 9- Implementation of MSF
 - 4.4.2 Question 15- Conservation benefit from MSF
- 4.5 Investigate and Promote the Development and Implementation of Alternative Gear
 - 4.5.1 Question 20- Alternative gear report
 - 4.5.2 Question 24- Pre vs. post alternative gear set aside analysis
- 4.6 In-season Management Actions
- 4.7 Transparency of Salmon Management and Catch Accounting
- 4.8 Implement Improved Broodstock Management
 - 4.8.1 Question 11- Hatchery genetic management plans (HGMP)
 - 4.8.2 Question 12- Broodstock management of coho and chum
- 4.9 Work with Partners to Protect and Restore Habitat Productivity
 - 4.9.1 Question 10- Habitat restoration
- 4.10 Work Through the Pacific Salmon Commission to Promote Conservation Objectives

5.0 Fall Chinook Salmon Management

- 5.1 Broodstock Management
 - 5.1.1 Question 13- Broodstock management of Chinook salmon
 - 5.1.2 Question 18- Definition and status of “Primary” stream designation (Willapa/North)
 - 5.1.3 Question 19- Definition and status of “Contributing” stream designation (Naselle)

- 5.2 Fishery Management
 - 5.2.1 Question 7- Distribution of fishing effort
 - 5.2.2 Question 22- Enhanced recreational opportunity
 - 5.2.3 Question 23- Total fishery Chinook salmon impact rates
- 5.3 Recreation Fisheries
 - 5.3.1 Question 6- Non-fishing outdoor recreation
 - 5.3.2 Question 16- In-season adaptive management
 - 5.3.3 Question 21- Recreational impact rate
- 5.4 Commercial Fisheries
- 5.5 Hatchery Production
 - 5.5.1 Question 27- Fall Chinook salmon hatchery releases
- 5.6 Stock Assessment
 - 5.6.1 Question 17- Natural origin Chinook salmon spawning escapement
- 6.0 Coho Management
 - 6.1 Broodstock Management
 - 6.1.1 Question 28- Definition and status of “Stabilizing” stream designation (Naselle)
 - 6.2 Fishery Management
 - 6.2.1 Question 29- Harvest control rule
 - 6.3 Recreation Fisheries
 - 6.3.1 Question 30- In-season adaptive management
 - 6.4 Commercial Fisheries
 - 6.5 Hatchery Production
 - 6.6 Stock Assessment
- 7.0 Chum Management
 - 7.1 Broodstock Management
 - 7.1.1 Question 31- Definition and status of “Contributing” stream designation (Palix)
 - 7.2 Fishery Management
 - 7.2.1 Question 33- Harvest control rule
 - 7.3 Recreation Fisheries
 - 7.3.1 Question 32- Provide opportunity
 - 7.4 Commercial Fisheries
 - 7.5 Hatchery Production
 - 7.6 Stock Assessment
- 8.0 Adaptive Management
 - 8.1 Conduct Annual Fishery Management Review
 - 8.1.1 Question 8- Adaptive management
 - 8.1.2 Question 25- Maintain rebuilding trajectory
 - 8.1.3 Question 26- Example of implementation
 - 8.2 Evaluation of Fishery Management Tools
 - 8.3 Improve In-season Management
 - 8.4 Review Spawner Goals
 - 8.4.1 Question 34- Chum and coho spawner goals
 - 8.5 Comprehensive Hatchery Assessment
 - 8.5.1 Question 35- Review results (Appendix 4)
 - 8.6 Ocean Ranching Report
 - 8.6.1 Question 36- Review results (Appendix 5)
- 9.0 Economic Analysis

- 9.1 Recreation Fisheries
 - 9.1.1 Question 5- Recreational effort
- 9.2 Commercial Fisheries
 - 9.2.1 Question 4- Commercial economics
- 10.0 References
- 11.0 Appendix 1. Draft Willapa Bay Chinook Salmon Spawner Recruit Analysis.
- 12.0 Appendix 2. 2015-2018 Annual Willapa Bay Fishery Management Presentations.
- 13.0 Appendix 3. Status Determination Criteria for Willapa Bay Natural Coho
- 14.0 Appendix 4. Willapa Bay Hatchery Assessment Presentation.
- 15.0 Appendix 5. Ocean Ranching Presentation.
- 16.0 Appendix 6. WBSAG Meeting Notes.
