**ADDENDUM 21-011 TO DETERMINATION OF NONSIGNIFICANCE (DNS) 20-010  
DATED: FEBRUARY 11, 2020**

**Name of Proposal:** DNS 20-010: ROSES LAKE ACCESS REDEVELOPMENT – PHASE 2

**Description of Addendum 21-011:**

Original measurements and other elements of the proposed work have been modified as indicated below in underlined red font. In addition, the 10' x 40' fishing float and the 10' x 15' fishing platform have exchanged locations: the fishing float will now be located slightly southeast of the originally-proposed location and the fishing platform will now be located slightly northwest of the originally-proposed location, as per the revised plans. A category II lake fringe wetland was identified along the shoreline adjacent to the structures. The fishing float will not impact this wetland. The fishing platform was re-positioned to avoid impacting the delineated wetland boundary.

**Description of Original Proposal:**

Washington Department of Fish and Wildlife proposes to upgrade the WDFW owned Roses Lake Access Site located in Chelan County. The existing site is a 6.36 acre parcel located along the south shoreline of Roses Lake, surrounded by agriculture and rural residential homes.

Phase II seeks to build on the phase I project by increasing pedestrian fishing capacity as well as providing new physical structures to base the pedestrian fishing from in efforts to provide a more stable and safe platform to pursue this recreational opportunity. The proposed structures will also have approximately 350LF of ADA accessible paved pathways leading to the shore-based structures from the existing parking area. More vegetation management-Removal of existing shrub vegetation will occur in order to ~~will also be undertaken to~~ facilitate the construction of the walking paths~~structures~~. To complete phase II at this site, WDFW proposes the following scope of work:

1. Install a new ADA-compliant 10'x40' fishing float with (4) steel pilings, mechanically driven into the lakebed, and accessed via a shore-mounted 60'x 45' gangway.
2. Site build a ~~28' x 16'~~ 10' x 15' ADA-compliant pedestrian fishing platform. ~~The platform will be shore based atop a cast in place concrete foundation. The platform will be suspended approximately 16' from the shore out over the lake via (3) steel piles mechanically driven into the lakebed. The platform will be shore-based using pre-cast concrete ultra-blocks back filled and asphalt paved to create the surfacing. This work will be accomplished using a combination of tracked excavator, and mobile crane.~~
3. Install approximately ~~155'x5'~~ 342' x 5' ADA-compliant paved and graveled walking paths from existing paved parking area along the northwest of the parking area that leads to the proposed fishing structures.

4. A compensatory mitigation plan will be implemented to mitigate for the new development of impervious surface. Impervious surface will increase by ~~2,115~~ 2,235 SF to include new gravel trails, asphalt trails, and ~~two~~ concrete abutments. Invasive plant species, primarily Himalayan blackberry will be removed prior to planting in the mitigation area, 2,850 SF. (See Sheet 9 of the Drawing Set)

**Location of Current Proposal:** WDFW Roses Lake Access Site, 2620 Green Ave., Manson, Chelan County, Washington: Township 28N, Range 21E, Section 26.

**Lead Agency:** Washington Department of Fish and Wildlife (WDFW)

This addendum is being distributed pursuant to WACs 197-11-600 and 197-11-625. The updated information provided above does not substantially change the analysis of significant impacts in the existing environmental checklist. Based on the original DNS and the updated information provided in this addendum, we have determined that a new threshold determination is not warranted. There is no comment period associated with this SEPA addendum.

**Responsible Official:** Lisa Wood
