---

Hello Ecology Team,

Thank you for reviewing and submitting comments for SEPA # 22052 for the WT Wooten Wildlife Area Campground No. 9. Best Management Practices (BMPs) for erosion and sediment control will be used at the construction site and adjacent areas to prevent upland sediments from entering surface waters in accordance with the 2019 Stormwater Management Manual for Eastern Washington. Ground disturbed by construction activities will be stabilized and use of native vegetation typical for the site will be used when appropriate and applicable for the project.

Sincerely,

**P. Frank Stevick**
