“GREEN SHEET”

Meeting: April 13-14, 2012
Agenda Item 19: Deer and Elk Area Boundaries – **Rule Action**
Prepared By: Jerry Nelson, Ph.D.
Presented By: Jerry Nelson, Ph.D., Deer and Elk Section Manager, Wildlife Program

Background:

The Commission will act on the proposed amendment of WAC 232-28-337.

Deer and elk areas are created when the Department needs to manage hunting seasons and/or damage removals at a finer scale than the Game Management Unit (GMU) level. It is a tool that can be used to better address damage issues that are site specific, or to better spread hunting pressure across a landscape.

The issue brought before the public and the Commission:

- Region One staff members recognize a need to distribute hunters using the quality deer special permits at a scale smaller than the Wenaha unit (GMU 169). The proposal is to split the GMU into east and west deer areas. The same GMU split already exists as two elk areas to better distribute hunters using elk special permits. This has been a successful strategy using both deer areas and elk areas in southeast Washington in the past.
-

Policy Issue(s) you are bringing to the Commission for consideration:

- Continue sustainable hunting seasons for deer and elk.
 - Direct deer and elk hunters on a scale smaller than the GMU level.
 - Facilitate special permit hunts and mitigate wildlife damage.
-

Public involvement process used and what you learned:

The Department conducted an extensive public involvement process to develop the 2012-2014 hunting season recommendations. In early August, an email was sent to over 50,000 hunters announcing that the Department was beginning the development of the 2012-2014 hunting season package. The email also informed them of the opportunity to provide their comments via an online issue scoping survey and invited them to attend one of the public meetings being held statewide. Six public meetings were held with approximately 150 people in attendance and nearly 4,000 responses were received on the scoping survey. In February, a postcard was mailed to approximately 600 organizations and individuals informing them of the opportunity to provide comments on the proposed regulations. These organizations and individuals were also informed of the opportunity to provide public testimony at the March Commission Meeting in Moses Lake.

Action requested (identify the specific Commission decisions you are seeking):

Amend WAC 232-28-337 Deer and elk area descriptions, as presented.

Draft motion language:

I move to amend WAC 232-28-337 as proposed.

Justification for Commission action:

These changes meet the approved criteria established by OFM as a result of the Governor's Executive Order 11-03 Extending Executive Order 10-06 Suspending Non-critical Rule Development and Adoption by satisfying the following conditions:

- Necessary to protect public health, safety, and welfare or necessary to avoid an immediate threat to the state's natural resources.
- Beneficial to or requested or supported by the regulated entities, local governments, or small businesses that it affects.

WAC 232-28-337 Deer and elk area descriptions.

RECOMMENDED ADJUSTMENTS

The following adjustments are proposed since the Code Reviser (CR 102) filing and are already included in your notebook.

Page 4

- Reinststate the boundary for Elk Area 3068 Klickitat Meadows. Initially the Department was proposing dropping the special permit elk hunts that occur in this elk area. That is no longer the case, so the elk area boundary language needs to be retained in order to conduct the special permit hunts.

Page 21

- Delete the boundary language for new Deer Area 1016. There was a miscommunication between staff. This deer area is not needed. The needs are covered by the existing Deer Area 1010.

SUMMARY OF WRITTEN PUBLIC INPUT

WAC 232-28-337 “Deer and elk area descriptions.”

COMMENTS	AGENCY RESPONSE
<p>While the Moratorium seeks limited comment, the significance of the 2011 boundary change in GMU 652-653 and limited recourse for the property owners requires that these comments still be submitted. Your review and consideration is appreciated.</p> <p>The 2011 regulations substantially shifted the boundary lines in GMU 652 and GMU 653, subsuming numerous private properties in the process. Some of those properties were originally in GMU 652 and property owners hunted in the vicinity without need to draw a permit through the lottery. Now as part of GMU 653 those property owners/hunters must draw a permit in the lottery to hunt their own property. This is a dramatic change from decades of use and difficult for some when this was the sole reason for purchasing their property. While it is understandable that prior GMU 652-653 boundary lines made enforcement difficult, we believe other alternatives are available that would accommodate property owners/hunters formerly in GMU 652. As a result the following alternatives are provided for consideration:</p> <ol style="list-style-type: none"> 1. If the primary issue driving the boundary change was that the boundary lines were difficult to locate, then the GMU 653 boundary could easily be reset starting from the high tension power lines at the intersection of Highway 165 and run along those lines east northeast to their intersection with the White River. This would allow a clear line for hunters to access, roads for access for WDFW to access via East and West in an area that has the likelihood of the highest amount of hunting in the area, as compared to the outer limits of the City of Buckley. 2. Alternative two proposes Ryan Road as the boundary for GMU 652-653. (Ryan Road east from Highway 165 to the Kapowsin Tree Farm ownership line then north to the White River). This would provide WDFW with a means of access to patrol all areas of the City of Buckley, as well as quick identification of poachers' locations because this provides a midway thoroughfare between the forested area to the south of the City of Buckley and the White River at the northern border of the City of Buckley. It would also provide easy access for WDFW vehicles and a means to surveil potential poachers parking near the city. This solution is a good compromise because it still provides WDFW with permit funds of the 653 GMU south of the City of Buckley, while at the same time reinstating the hunting privileges of numerous private property owners, by returning their properties back to GMU 652, north of Ryan Road. A final benefit would be the potential added revenue that hunters from out of the area would bring to the City of Buckley. 3. Alternative three calls for private property owners in GMU 653 to have an open archery season for elk on their private property, as long as there is no showing of a decline of the elk population in the vicinity. Currently there is no showing of a declining population in this area. 4. Alternative four calls for private property owners in GMU 653 to purchase the right to have an open archery season for elk on their private property, assuming the purchase price is a modest amount. This is a "win-win" for the private property owner and WDFW. This would allow the private property owner to retain the ability to hunt on their private property and it would create another revenue stream for WDFW. 	<ol style="list-style-type: none"> 1. The intent behind the change was to create an easily identifiable, and enforceable boundary; however there were also trespassing and other considerations as well. Enforceability – it is important for GMU boundaries to be identifiable and enforceable, and the original boundary was neither. The 2011 boundary change has created an identifiable, enforceable boundary. <p>The power line boundary option that was presented by petitioners created an identifiable boundary, but our local enforcement staff expressed serious concerns about its enforceability as access would be extremely limited.</p> <p>Land ownership issues – The original boundary included all of Hancock Timber Resource Group (Hancock) in one GMU, and the 2011 retains that aspect. The power line boundary option cuts through Hancock, creating more land management problems for the landowner and any enforcement entity that was called to enforce trespass issues (e.g., WDFW or Pierce County Sheriff).</p> <p>WDFW has received a letter from Hancock supporting the 2011 GMU boundary location and has contacted WDFW staff with concerns that a change to the power line would increase trespass violations on their property. WDFW enforcement officers report that calls for their response to trespass violations in the area of concern have decreased dramatically since the 2011 boundary change.</p> <p>Acres: The 2011 boundary change moved a total of 4, 610 acres into GMU 653 – a 1 percent reduction in GMU 652 acreage. Within the changed area, there are a total of 1,675 acres of “hunnable” area (i.e., not in Buckley city limits, or otherwise owned/managed for no trespassing or no hunting without a permit).</p> <p>Landowners: There are approximately 214 landowners in the “hunnable” area with an average parcel size of 4.7 acres. There are approximately 35 landowners who own parcels over 10 acres in size and only 16 of those own more than 20 acres. The number of landowners who own property that could easily be hunted is fairly small.</p> <ol style="list-style-type: none"> 2. WDFW, Region 6 has not received this suggestion until this comment was submitted. Additional time will be needed to evaluate the merits of this option. Consideration of a boundary line adjustment will be based on the objectives of the original boundary line adjustment – identification in the field, enforceability, and land management/trespass issues. If a boundary line adjustment is warranted, staff may develop a recommendation for consideration by the Fish and Wildlife Commission. 3. Under current rules and policies this option is not available. 4. Under current rules and policies this option is not available.

COMMENTS	AGENCY RESPONSE
<p>I have been hunting the white river elk herd for 15 years in GMU 652. Last year the boundaries changed and where I usually hunt changed to 653 permit only. I think that if I can watch a Muckleshoot Indian hunt elk in GMU 653 with a rifle during September rut, I should be able to hunt with a muzzloader. I don't understand why my hands seem to be getting tied, and the Indians keep getting more and more. The boundary change was located in the Buckley area; I am sure you have had other complaints. Thank you for taking the time to read my concern.</p>	<p>The Game Management Units WAC (232-28-336) for Region 6 is not before the Fish and wildlife Commission for the March and April meetings.</p> <p>The change to the boundary between GMUs 652 and 653 was intended to create an easily identifiable, and enforceable boundary; however, there were also trespassing and other considerations as well.</p> <p>It is important for GMU boundaries to be identifiable and enforceable and the original boundary was neither. ATTACHMENT A

WAC 232-12-047 Unlawful methods for hunting.

Purpose of the proposal and its anticipated effects, including any changes in existing rules: This proposed amendment is intended to further the discussion on what should be allowed for crossbow use during modern firearm seasons.

Reasons supporting proposal: This proposal facilitates public discussion of new technologies and consideration of acceptable fair chase and ethical standards for hunting.

WAC 232-12-054 Archery requirements - Archery special use permits.

Purpose of the proposal and its anticipated effects, including any changes in existing rules: This proposed amendment is intended to further the discussion on allowing illuminated nocks for archery equipment.

Reasons supporting proposal: This proposal facilitates public discussion of new technologies and consideration of acceptable fair chase and ethical standards for hunting.

WAC 232-12-063 Hunting at night – regulations – penalties.

Purpose of the proposal and its anticipated effects, including any changes in existing rules: This proposal would clarify how a hunter can hunt small game and unclassified wildlife at night and would complement existing night hunting rules.

Reasons supporting proposal: The proposal would provide greater certainty for officers in determining whether a hunter is lawfully hunting at night.

WAC 232-12-243 Public safety cougar removals.

Purpose of the proposal and its anticipated effects, including any changes in existing rules: The purpose of the proposed WAC amendment is to identify when public safety cougar removals are warranted for the protection of public safety and private property. The proposed WAC changes remove the use of “cougar sighting events” or “nuisance behavior” to trigger a public safety cougar removal. The proposed WAC also renames the program from “cougar management removal” to “public safety cougar removal.”

Reasons supporting proposal: This proposal better aligns the WAC language and actions with the terms used in the RCW authority.

WAC 232-12-257 Use of decoys and calls.

Purpose of the proposal and its anticipated effects, including any changes in existing rules: This proposed amendment is intended to further the discussion on the use of electronic technology for waterfowl hunting.

Reasons supporting proposal: This proposal facilitates public discussion of new technologies and consideration of acceptable fair chase and ethical standards for hunting.

WAC 232-12-264 Baiting of game birds – Unlawful.

Purpose of the proposal and its anticipated effects, including any changes in existing rules: This proposed amendment is intended to clarify the existing rule on baiting of game birds, and align the rule with current federal regulations on baiting of migratory game birds.

Reasons supporting proposal: This amendment was requested by the Washington Fish and Wildlife Commission, subsequent to a Commission presentation in September 2009, to facilitate consistent enforcement of state and federal baiting rules by the Department and U.S. Fish and Wildlife Service.

WAC 232-28-273 2012-2014 Moose, bighorn sheep, and mountain goat seasons and permit quotas.

Purpose of the proposal and its anticipated effects, including any changes in existing rules: The proposed WAC changes amend seasons for moose, bighorn sheep, and mountain goat. Winter surveys indicate moose populations are stable. The Department recommends minor permit level adjustments based on recent survey results. The Department also recommends redefining Mt. Spokane moose hunts in GMU 124 into two moose areas, Mt. Spokane North and Mt. Spokane South, and increasing permit levels slightly in those areas to control population levels. Based on the recommendation, statewide permit levels would change from 140 to 152. The anticipated effect is stable moose populations in core areas with more control on moose population growth in areas surrounding Spokane. Hunter opportunity will increase slightly.

All bighorn sheep populations that we are currently hunting either meet or exceed total population objectives. However the number of adult rams fluctuates and we are recommending reductions in ram harvest for several units consistent with the population thresholds in the Game Management Plan (2008). Based on the recommendation, statewide permit levels would change from 41 to 31. The anticipated effect is stable bighorn sheep populations in all hunted areas. Hunter opportunity will decrease slightly.

Mountain goat populations are managed for stable-to-increasing populations in all hunted areas. Changes in permit levels are based on annual survey counts and tend to be conservative, given the sensitivity of goats to overharvesting. The Department recommends status quo delegated authority for existing hunt area permit levels, plus the addition of two hunt areas each with 1 permit. Under that authority the Department will be rotating and reducing hunting pressure in the goat units surrounding Mt. Baker, based on recent survey results. With the delegated authority, statewide permit levels would change from 15 to 17. The anticipated effect is stable mountain goat populations in all hunted areas. Hunter opportunity will increase slightly.

Reasons supporting proposal: This proposal incorporates permit level changes based on the population thresholds and criteria in the Game Management Plan (2008).

WAC 232-28-286 2013, 2014, and 2015 Spring black bear seasons and regulations.

Purpose of the proposal and its anticipated effects, including any changes in existing rules: The proposed rule amendments establish the 2013, 2014, and 2015 spring black bear seasons. The purpose is to: 1) reduce tree damage by bears in western Washington; 2) disperse harvest geographically and reduce female harvest in southeastern Washington; and 3) reduce nuisance and damage activity in northeastern Washington, while maintaining long-term sustainable populations in each Black Bear Management Unit (BBMU) --except Puget Sound and Columbia Basin BBMUs. The anticipated effects of the rule are continued recreational harvest opportunities similar to 2009-2011 levels and long-term sustainable bear populations.

Reasons supporting proposal: Spring bear opportunity is provided to address management needs rather than solely for the purpose of providing recreational opportunity. This is due to the public's sensitivity to hunting bears while adult females are accompanied by the young of the year. The Department did not receive any requests for additional spring bear harvest to address the management needs listed above, except for additional bear harvest in northeastern Washington to address nuisance bear issues. Based on the population thresholds outlined in the Game Management Plan, hunting may be impacting the bear population in northeastern Washington; that is, the "median age of harvested females" indicator suggests bear harvest may be impacting the regional bear population. As such, any additional spring bear harvest in the area would require equivalent reductions to fall bear harvest to offset any additional population impacts. During the scoping phase of this WAC, survey data indicated

respondents preferred status quo spring seasons rather than adding harvest opportunity in the spring coupled with reductions in the fall season.

WAC 232-28-288 2012-2014 Fall black bear hunting seasons and regulations.

Purpose of the proposal and its anticipated effects, including any changes in existing rules: The proposed rule establishes the 2012, 2013, and 2014 fall black bear seasons. The purpose is to provide recreational harvest opportunities for black bear, while maintaining long-term sustainable populations in each BBMU --except Puget Sound and Columbia Basin BBMUs. The anticipated effects of the rule are to maintain recreational harvest trends similar to 2009-2011 levels. The anticipated effect to the bear population is a long-term sustainable bear populations statewide.

Reasons supporting proposal: The parameters used as population indicators by the Department to evaluate the impacts of hunting on the bear populations are either stable or trending in the right direction. Therefore, no significant changes are recommended at this time.

WAC 232-28-296 Landowner hunting permits.

Purpose of the proposal and its anticipated effects, including any changes in existing rules: The purpose of this proposal is to expand the number of special hunting opportunities available on private lands for hunters. The recommended changes would add two additional cooperators in eastern Washington.

Reasons supporting proposal: The Fish and Wildlife Commission developed a policy to expand the private lands available for hunting to the general public several years ago. One of the programs that was authorized under their authority is the Landowner Hunting Permit program. This program encourages landowners to provide opportunity to the general hunter in exchange for customized hunting seasons and the ability to generate funding to offset the cost of providing public access.

WAC 232-28-297 2012-2013, 2013-2014, and 2014-2015 Cougar hunting seasons and regulations.

Purpose of the proposal and its anticipated effects, including any changes in existing rules: The purpose of the proposal is to establish the 2012-2013, 2013-2014, and 2014-2015 cougar hunting seasons. The proposal establishes hunt areas and associated harvest guidelines for the entire state (except Columbia Basin and Puget Sound Cougar Management Units). The harvest guideline represents a sustainable 12-16 percent harvest rate for each hunt area. The anticipated effects to the cougar population are to maintain a stable population and to maintain an adequate age structure for cougar populations equally distributed across the state.

Reasons supporting proposal: Recently published studies suggest that a 12-16 percent harvest rate of a local cougar population is the maximum harvest rate that still has a high probability for maintaining a stable cougar population along with stable adult male territorial behavior. Harvest rates in excess of 16 percent can result in declines in core populations of breeding females, and excessive male harvest rates result in the loss of adult male territorial behavioral, which acts as a regulatory mechanism for local male cougar numbers.

WAC 232-28-337 Deer and elk area descriptions.

Purpose of the proposal and its anticipated effects, including any changes in existing rules: The proposed language eliminates one elk area and creates three new deer areas. Deer and elk areas help direct hunters when a scale smaller than the Game Management Unit (GMU) is needed. Deer and elk areas help staff deal with wildlife damage problems.

Reasons supporting proposal: The proposed language allows the Commission to distribute hunters more favorably during quality hunts. Proposed language also helps delineate when state authorized deer

hunting is and is not allowed at a smaller scale within the GMU. Proposed language eliminates an elk area that is associated with a special permit elk hunt that is no longer being conducted.

WAC 232-28-342 2012-13, 2013-14, 2014-15 Small game seasons.

Purpose of the proposal and its anticipated effects, including any changes in existing rules: This amendment proposes calendar date adjustments to most small game seasons, expands the wild turkey season in eastern Washington, reinstates the September Canada goose season in eastern Washington, and shifts the crow season one month earlier.

Reasons supporting proposal: This proposal provides for the continuation of hunting seasons on small game species to provide recreational opportunity and depredation control.

WAC 232-28-357 2012-2014 Deer general seasons and definitions.

Purpose of the proposal and its anticipated effects, including any changes in existing rules: The purpose of this proposal is to retain general season deer hunting opportunity, balance the hunting opportunity between user groups, increase opportunity when deer populations allow, and reduce opportunity when declining deer numbers warrant a change. The proposal would repeal the old deer general seasons for 2009-2011 and adopt the new deer seasons for 2012-2014.

Reasons supporting proposal: This proposal provides recreational deer hunting opportunity and protects deer from overharvest. The proposal would maintain sustainable general deer hunting season opportunities for 2012 through 2014. The proposal helps address deer damage problems and provides for deer population control when needed.

WAC 232-28-358 2012-2014 Elk general seasons and definitions.

Purpose of the proposal and its anticipated effects, including any changes in existing rules: The purpose of this proposal is to retain general season elk hunting opportunity, balance the hunting opportunity between user groups, increase opportunity when elk populations allow, and reduce opportunity when declining elk numbers warrant a change. The proposal would repeal the old elk general seasons for 2009-2011 and adopt the new elk seasons for 2012-2014.

Reasons supporting proposal: This proposal provides recreational elk hunting opportunity and protects elk from overharvest. The proposal would maintain sustainable general elk hunting season opportunities for 2012 through 2014. The proposal helps address elk damage problems and provides for elk population control when needed.

WAC 232-28-359 2012 Deer special permits.

Purpose of the proposal and its anticipated effects, including any changes in existing rules: The purpose of this proposal is to retain special permit deer hunting opportunity that is above and beyond what is offered for general seasons. The proposal would repeal the old deer special permit seasons for 2011 and adopt the new deer special permit seasons for 2012. The proposal adjusts special permits for deer for 2012 in response to deer population changes and damage complaints. The proposal would help reduce or minimize agricultural damage and provides for population control of deer where needed.

Reasons supporting proposal: The proposal continues to provide recreational deer hunting opportunity while protecting deer from overharvest and helps minimize deer agricultural damage.

WAC 232-28-360 2012 Elk special permits.

Purpose of the proposal and its anticipated effects, including any changes in existing rules: The purpose of this proposal is to retain special permit elk hunting opportunity that is above and beyond what is offered for general seasons. The proposal would repeal the old elk special permit seasons for 2011

and adopt the new elk special permit seasons for 2012. The proposal adjusts special permits for elk for 2012 in response to elk population changes and damage complaints. The proposal would help reduce or minimize agricultural damage and provides for population control of elk where needed.

Reasons supporting proposal: The proposal continues to provide recreational elk hunting opportunity while protecting elk from overharvest and helps minimize elk agricultural damage.
