Summary

Meeting dates:	April 12, 2013
Agenda item 12:	Deer and Elk Areas and GMU Boundaries – Rule Action
Presenter(s):	Jerry Nelson, Ph.D., Deer and Elk Section Manager, Wildlife Program

Background summary:

Staff will brief the Commission on proposed amendments to WAC 232-28-334 Game management units (GMUs) boundary descriptions --Region four; WAC 232-28-336 Game management units (GMUs) boundary descriptions-- Region six; 232-28-248 Special closures and firearm restriction areas; and WAC 232-28-337 Elk area descriptions; and the proposed adoption of WAC 232-28-624 Deer area descriptions.

Currently, boundary descriptions for deer and elk areas are contained within a single WAC, 232-28-337. New WAC 232-28-624 contains boundary descriptions for deer areas only and the amendment proposal for WAC 232-28-337 contains boundary descriptions for elk areas only. The proposal is to expand one Elk Area in Region 4 to better address elk damage issues in the Skagit Valley. The proposal also includes eliminating one Elk Area in Region 3 that has changed ownership and the new owners will not be allowing access for the associated hunt.

Historically, the islands in the Puget Sound have been encompassed by mainland Game Management Units (GMUs). The islands were defined as deer areas to allow the development of island-specific deer hunting seasons. Harvest data is currently at the GMU scale. To improve the quality of the reported harvest data, the Department is proposing to convert the island deer areas into GMUs.

Big game closure information pertaining to a federal wildlife refuge in WAC 232-28-248 is obsolete. The proposal is to remove the obsolete information and direct hunters to contact the land manager directly to get the most up to date information on hunting access opportunities.

Policy issue(s) you are bringing to the Commission for consideration:

- Maximizing hunting recreational opportunity.
- Managing damage issues utilizing hunters.
- Changing the designation of several island deer areas in the Puget Sound to GMUs to improve harvest data accuracy.

Public involvement process used and what you learned:

Notification was made to approximately 600 individuals and organizations informing them of the opportunity to provide comment on the proposed regulations. Additionally these individuals and organizations were informed of the opportunity to provide testimony at the March 1-2, 2013 Commission Meeting in Moses Lake.

Action requested:

Amend WAC 232-28-334, WAC 232-28-336, WAC 232-28-248, and WAC 232-28-337, and adopt WAC 232-28-624, as proposed.

Draft motion language:

I move to amend WAC 232-28-334, WAC 232-28-336, WAC 232-28-248, and WAC 232-28-337, and adopt WAC 232-28-624, as proposed.

Justification for Commission action:

- To address tribal issues, limited access, and lack of harvest success.
- To provide opportunity for hunters consistent with achieving management objectives addressing damage problems.
- To improve harvest data accuracy.

WAC 232-28-248 Special closures and firearm restriction areas.

RECOMMENDED ADJUSTMENTS

The following adjustments are proposed since the Code Reviser (CR 102) filing and are already included in your notebook.

Pages 1-9

- Several technical amendments were made throughout this section to improve the clarity and accuracy of the rule.

Page 3

- The first sentence in Section 3(b) was altered to read as follows: “Except for special permits issued by the Department for non-endangered deer and elk, this area is closed to all deer and elk hunting to protect the Columbian white-tailed deer.”

This exception was added because the Department is required to issue damage permits to mitigate agricultural damage and also the proper terminology for Columbian white-tailed deer should be used.

- Section 3c was eliminated. Section 3c specifies certain areas of a federal wildlife refuge that were not open to big game hunting. This information is now obsolete. The areas that will be open on the refuge in the future will vary from year to year. Rather than attempt to codify these future closures, over which the Fish and Wildlife Commission has no purview, the Department will direct hunters to contact the wildlife refuge directly to get the most up-to-date information.

Page 4

- Subsection 4.(c) was altered to read as follows: “Walla Walla Mill Creek Watershed (GMU 157): All lands in the Mill Creek Watershed are designated as a "CLOSED AREA" to the hunting of all wild animals, including wild birds. The only exception is for deer or elk hunting by holders of GMU-157 special deer or elk permits during the established open season.”

WDFW currently offers both deer and elk special permits for GMU 157 so the clarification needs to be made what big game hunting access is allowed.

Page 6

- Under Island County GMUs 420 and 421 were added. These islands are newly created GMUs, but their firearm restriction designation hasn't changed, so they need to be added to the firearm restriction section as GMUs.
- Under King County GMU 422 was added. This island is a newly created GMU, but its firearm restriction designation hasn't changed, so it needs to be added to the firearm restriction section as a GMU.

Page 7

- Under Pierce County GMU 655 was added. This island is a newly created GMU, but its firearm restriction designation hasn't changed, so it needs to be added to the firearm restriction section as a GMU.
- Under San Juan County GMUs 411 (Orcas), 412 (Shaw), 413 (San Juan), 414 (Lopez), 415 (Blakely), and 416 (Decatur) were added. These islands are newly created GMUs, but their firearm restriction designation hasn't changed, so they need to be added to the firearm restriction section as GMUs.
- Under Skagit County GMU 419 (Guemes) was added. This island is a newly created GMU, but its firearm restriction designation hasn't changed, so it needs to be added to the firearm restriction section as a GMU.

SUMMARY OF WRITTEN PUBLIC INPUT

WAC 232-28-248 Special closures and firearm restriction areas.

COMMENTS	AGENCY RESPONSE
<p>As a hunter, without reservation, I believe that safety is paramount. It is also my belief that the current firearm restriction boundaries in GMU 681 & GMU 684 are antiquated and need to be revised. Many homes have been built in areas that are currently open to modern firearms in the GMU's mentioned above. I happen to own one of them. When the current boundary was established these areas were not as densely populated. It is my understanding when the Lewis Unit reopens in the fall of 2013 for big game hunting, it has already been designated as a firearm restricted area do to legitimate safety concerns. I believe that this would be the right time to review and make changes to the current GMU 681 & GMU 684 boundaries. My proposal would be to include everything west of US Hwy 101 from Greenhead Slough south to alternate US101. In all reality I believe all of GMU 684 should fall under the firearm restricted area. My goal isn't to prevent hunting, far from it, but to use wisdom in planning for a safe hunting environment. With the spotlight on those of us who own guns and hunt, along with today's technology, modern rifles are capable of shooting 500, 600...1,000 yards and I believe this range is too great for such a small geographic area.</p>	<p>We appreciate your comment. Changes to firearm restriction areas typically come from Regional Enforcement staff and Regional Wildlife staff working together to come up with new or different boundaries to address any safety concerns. We will work with Region 6 staff to see if any changes need to be considered.</p>
<p>I just spoke with Nancy Holman of FWS today and she informed me that all lands except a small area around the office complex for the Willapa refuge will be open for big game hunting. The proposed changes that I received by email say everything is closed except Long Island and is in error!</p>	<p>Thank you for that correction. We have addressed this in the Big Game Closures section of 232-28-248. In the Big Game Pamphlet, we will direct hunters to seek specific details of closed and open areas from the USFWS wildlife refuge.</p>

RECOMMENDED ADJUSTMENTS

The following adjustments are proposed since the Code Reviser (CR 102) filing and are already included in your notebook.

Pages 40-69

- Several technical amendments were made throughout this section to improve the clarity and accuracy of the rule.

Page 43

- Elk Area 3068 Klickitat Meadows was eliminated because ownership of the property has changed. The new owners will not be allowing access for this hunt.

Pages 59

- Modify boundary language for Elk Area 6069 Hanaford as proposed. The old boundary included an active logging operation road that some hunters were traveling on which had become unsafe. This new boundary should reduce that potential conflict.

ATTACHMENT A

WAC 232-12-021 Importation and retention of dead nonresident wildlife.

Purpose of the proposal and its anticipated effects, including any changes in existing rules:

The states and provinces listed in this WAC have confirmed chronic wasting disease (CWD) in their wild, free-ranging populations of cervids. This proposal would add the states of Texas and Missouri to those states where additional processing of deer, elk, and moose carcasses is required before they can be brought into Washington.

Reasons supporting proposal:

The proposal reduces the risk of CWD being imported into Washington State via carcasses of animals harvested in other states. Reducing disease risk helps in sustaining deer, elk, and moose hunting opportunities in Washington.

WAC 232-12-054 Archery requirements – Archery special use permits.

Purpose of the proposal and its anticipated effects, including any changes in existing rules: This proposed amendment is intended to further the discussion on allowing illuminated nocks for archery equipment.

Reasons supporting proposal: This proposal facilitates public discussion of new technologies and consideration of acceptable fair chase and ethical standards for hunting.

WAC 232-28-248 Special closures and firearm restriction areas.

Purpose of the proposal and its anticipated effects, including any changes in existing rules: This proposed amendment is part of the effort to streamline, reorganize, and update rules in the WAC Overhaul Project currently underway. Anticipated effects are minimal; this project involves merely rewording and clarifying a rule already in existence.

Reasons supporting proposal: The department needs these changes to increase efficiency, functionality, and clarity of the rules within its Administrative Code.

WAC 232-28-273 2012-2014 Moose seasons and permit quotas.

Purpose of the proposal and its anticipated effects, including any changes in existing rules:

This amendment clarifies that the exemption from the once-in-a-lifetime moose restriction is also applicable if the hunter applies in the future for a hunt in the permit categories of antlerless moose: raffle, auction, or master hunter. Additionally, this amendment reduces the number of master-hunter moose permits.

Reasons supporting proposal:

The proposed change in language reduces ambiguity regarding who may apply for a moose permit. The reduction in master hunter moose permits reflects the expected number of hunters needed in 2013 and beyond, based on the experience of recent years.

WAC 232-28-286 2013, 2014, and 2015 Spring black bear seasons and regulations.

Purpose of the proposal and its anticipated effects, including any changes in existing rules:

The purpose for amending the 2013-15 spring black bear hunting seasons is to expand opportunity in the north Puget Sound. These spring seasons are mainly established to address damage caused by bears to commercially grown trees. The hunt utilizes recreational hunters to harvest black bears in areas where

chronic tree damage and other property damage has been documented and allows the department to disperse harvest geographically and target male bears. This strategy helps ensure long-term sustainability in the black bear population and provides recreational opportunity for hunters.

Reasons supporting proposal: Spring bear hunting helps address commercial tree damage issues and provides recreational hunting opportunity. In the past, most black bear damage was addressed using depredation permits where the landowner would contract with a hunter using dogs to kill multiple bears near areas with tree damage. Depredation permit hunters were taking an increasing number of bears each year, and over 150 bears were being killed annually. The spring black bear season allows recreational hunters to better target the areas receiving damage and allows hunters rather than contractors to harvest bears.

WAC 232-28-296 Landowner hunting permits.

Purpose of the proposal and its anticipated effects, including any changes in existing rules:

The purpose of this proposal is to expand the number of special hunting opportunities available on private lands for hunters and to maintain the number of cooperating landowners.

Reasons supporting proposal: Several years ago, the Fish and Wildlife Commission developed a policy to expand the private lands available to the general public for hunting. One of the programs that was authorized is the Landowner Hunting Permit Program. This program encourages landowners to provide opportunity to the general hunter in exchange for customized hunting seasons and the ability to generate funding to offset the cost of providing public access.

WAC 232-28-334 Game management units (GMUs) boundary descriptions -- Region four.

Purpose of the proposal and its anticipated effects, including any changes in existing rules:

This proposal changes the management area designation of the Puget Sound Islands from Deer Areas to Game Management Units (GMUs). The proposed amendments will allow the Department to better track harvest removals specific to the islands.

Reasons supporting proposal:

This proposal will allow the Department to better track harvest removals specific to the Puget Sound Islands rather than having those removals lumped with mainland GMUs.

WAC 232-28-336 Game management units (GMUs) boundary descriptions -- Region six.

Purpose of the proposal and its anticipated effects, including any changes in existing rules:

The purpose of the proposal is to designate Anderson Island as a Game Management Unit rather than a Deer Area. The proposed language will allow the Department to better track harvest removals specific to the island.

Reasons supporting proposal:

The proposed changes will allow the Department to better track harvest removals specific to the Anderson Island rather than having those removals lumped with a mainland GMU.

WAC 232-28-337 Elk area descriptions.

Purpose of the proposal and its anticipated effects, including any changes in existing rules:

The purpose of the proposal is to separate Elk Area descriptions from Deer Area descriptions. The proposal also removes one Elk Area that is no longer needed and adjusts the boundary of two other Elk

Areas to make them more effective in dealing with wildlife conflict. Additional language modifications have been made to improve clarity.

Reasons supporting proposal:

Elk Areas help direct hunters at a scale smaller than the GMU when needed. Elk Areas also help staff address local wildlife conflict problems. Some of the language modifications in this proposed amendment are part of the effort to streamline, reorganize, and update rules in the WAC Overhaul Project currently underway.

WAC 232-28-342 2012-13, 2013-14, 2014-15 Small game and other wildlife seasons and regulations.

Purpose of the proposal and its anticipated effects, including any changes in existing rules:

The purpose of this proposal is to add GMU 145 to the late fall turkey season. This GMU was inadvertently omitted during the three-year season-setting process. This proposal also modifies bag-limit language pertaining to fall turkey permit seasons. The change to the bag-limit language clarifies that hunters who kill a turkey during the permit seasons may still participate in the other fall seasons open to all hunters.

References to the western Washington Dungeness pheasant release site are also removed under the western Washington pheasant seasons.

Reasons supporting proposal:

GMU 145 is surrounded by other GMUs open during the late fall season. The intent was to include this unit in the three-year proposal. The department supports providing opportunity in this unit.

Turkey populations are healthy or increasing in areas where fall general seasons are in place, and the department is encouraging additional harvest and recreational opportunity in these areas. Allowing harvest during the general seasons by those who draw permits poses no concern for the population.

Clallam County owns the Dungeness release site and has decided to no longer allow use of the area for upland bird hunting. For this reason, removing references to this site is appropriate.

WAC 232-28-357 2012-2014 Deer general seasons and definitions.

Purpose of the proposal and its anticipated effects, including any changes in existing rules:

The purpose of this proposal is to retain general-season deer hunting opportunity. The purpose is also to balance the hunting opportunity between user groups; increase opportunity when deer populations allow; and reduce opportunity when declining deer numbers warrant a change.

Reasons supporting proposal: The proposed amendment provides recreational deer hunting opportunity and protects deer from overharvest. The amendment would maintain sustainable general deer hunting season opportunities for 2013; address deer damage problems; and provide for deer population control when needed.

WAC 232-28-358 2012-2014 Elk general seasons and definitions.

Purpose of the proposal and its anticipated effects, including any changes in existing rules:

The purpose of this proposal is to retain general-season elk hunting opportunity. The purpose is also to balance the hunting opportunity between user groups; increase opportunity when elk populations allow; and reduce opportunity when declining elk numbers warrant a change.

Reasons supporting proposal: This proposal provides recreational elk hunting opportunity and protects elk from overharvest. The proposed amendment would maintain sustainable general elk hunting season

opportunities for 2013; address elk damage problems; and provide for elk population control when needed.

WAC 232-28-359 2013 Deer special permits.

Purpose of the proposal and its anticipated effects, including any changes in existing rules:

The purpose of this proposal is to retain special-permit deer hunting opportunity. The purpose is also to balance the hunting opportunity between user groups; increase opportunity when deer populations allow; and reduce opportunity when declining deer numbers warrant a change.

Reasons supporting proposal: This proposal provides recreational deer hunting opportunity and protects deer from overharvest. The proposed amendment would maintain sustainable deer special-permit hunting season opportunities for 2013; address deer damage problems; and provide for deer population control when needed.

WAC 232-28-360 2013 Elk special permits.

Purpose of the proposal and its anticipated effects, including any changes in existing rules:

The purpose of this proposal is to retain special-permit elk hunting opportunity. The purpose is also to balance the hunting opportunity between user groups; increase opportunity when elk populations allow; and reduce opportunity when declining elk numbers warrant a change.

Reasons supporting proposal: This proposal provides recreational elk hunting opportunity and protects elk from overharvest. The proposed amendment would maintain sustainable elk special-permit hunting season opportunities for 2013; address elk damage problems; and provide for elk population control when needed.

WAC 232-28-622 Big horn sheep seasons and permit quotas.

Purpose of the proposal and its anticipated effects, including any changes in existing rules:

Hunters may apply for a bighorn sheep permit even if they've previously harvested a bighorn sheep in Washington if the earlier harvest was a bighorn sheep killed under a ewe-only hunt permit, a raffle permit, or an auction permit. Language in this amendment clarifies whether the exemption from the once-in-a-lifetime bighorn sheep restriction is also applicable if the hunter applies in future for a hunt in these categories.

Rocky Mountain bighorn sheep populations in the Blue Mountains area of south-eastern Washington have been reduced in past years due to the lingering effects of pneumonia outbreaks. Pneumonia was detected in the Asotin herd in 2012, and biologists expect this herd to decline over the next few years, although a few older rams remain in this herd.

Reasons supporting proposal:

The change in language reduces ambiguity regarding who may apply for a bighorn sheep permit. The reduction in hunting permits for the Blue Mountain area will reduce pressure on a herd that is experiencing a disease problem, and increase the chances for a high quality ram taken from this herd by the winner of the Rocky Mountain bighorn sheep raffle.

WAC 232-28-623 2012-2014 Mountain goat seasons and permit quotas.

Purpose of the proposal and its anticipated effects, including any changes in existing rules:

Language in this amendment clarifies whether the exemption from the once-in-a-lifetime mountain goat restriction is also applicable if the hunter applies in future for a hunt in these categories.

The proposed amendment also clarifies the names and descriptions of mountain goat hunt areas in Region 4, around Mt. Baker, and establishes legal descriptions of open mountain goat hunt areas.

Reasons supporting proposal:

Changes in language reduce ambiguity regarding who may apply for a bighorn sheep permit; remove inconsistency between the WAC, pamphlet, and instructional letters sent to permit holders; and clarify hunting unit boundaries for mountain goats in the Mt. Baker area.

WAC 232-28-624 Deer area descriptions.

Purpose of the proposal and its anticipated effects, including any changes in existing rules:

The purpose of the proposal is to separate Deer Area descriptions from Elk Area descriptions to improve the clarity of these rules. The proposal also removes the Puget Sound Islands that were previously described as Deer Areas. The Department is proposing that those islands be described as Game Management Units (GMUs) in the future. Additional language modifications have been made to improve clarity.

Reasons supporting proposal:

Deer Areas help direct hunters at a scale smaller than the GMU and help staff address wildlife conflict problems. Some of the language modifications in this proposed amendment are part of the effort to streamline, reorganize, and update rules in the WAC Overhaul Project currently underway.
