

Summary

Meeting dates: June 10-11, 2016
Agenda item: Climate change effects on fish and wildlife management
Presenter(s): Dr. Meade Krosby, UW Climate Impacts Group
Lynn Helbrecht, Habitat Program

Background summary:

This presentation was requested by Commissioner Kehne several months ago. The focus of Dr. Krosby's presentation is to explore the role of new climate-related research and tools in informing key decisions in fish and wildlife management. Department staff Lynn Helbrecht will follow Dr. Krosby to highlight WDFW's progress in integrating climate change into our work.
